- > Watch for snakes, they generally will go the other way
- > A short pole is best to use in thick under brush
- > Cast into pools away from running water

- > Use 6 foot cane pole with 8 foot line is best
- > Add small weight, small bobber and size 10-16 hook
- > Use just a bit of worm on the hook
- > Fish 8-12 inches deep, really depending on water depth
- > The fish will take the bobber under
- > Just because someone just fished it, they didn't get them all
- > Bigger steams don't be surprised to get a catfish or bream
- > Cast into pool and let float drift in current, repeat, then go on
- > Leave your cell phone in the car, you are going to get wet
